# MECHANICAL GEARBOX SECURITY

DEFEND LOCK is proved **mechanical gearbox security** that forms basic security of the car. The lock has **simple handling**, you can **lock it without using a key**. It can be used for cars with both **manual and automatic gearbox**. Gear locks DEFEND LOCK have high effectiveness and are affordable. They are suitable both for manual and automatic gearbox.

#### MAIN ADVANTAGES OF DEFEND LOCK

- Massive metal mechanism firmly connected with coachwork of the car without disruption.
- 5 year warranty (in case of meeting required warranty checks)
- Car insurance discount
- More than 1.000 models of locks for most car brands.

#### IT HAS UNIQUE LOCK CYLINDER

- Protected by a patent with reversible key and own DEFEND LOCK profile.
- For safety reasons the duplicate can be made only after presentation of ID card in the production company.
- It has protection against accidental locking
- Very easy unlocking.
- Resists Bump Key method.
- Resists heat impacts including hypothermia by liquid nitrogen.
- The lock is resistant to drilling, breaking and touching.

#### LOCKING IS SIMPLE

- via simple move without using a key.
- It has protection against accidental locking.

#### LOCK IS SUITABLY AND NOTABLY PLACED IN THE CAR INTERIOR

- simple visual control of locked state
- visible from outside for the potential thief who is usually discouraged.
